

**Los Angeles County Municipal Storm Water Permit
City of Industry Individual Annual Report**

Attachment A – Staff Training Log

The City of Industry maintains a small staff of employees in any one department, which each consist of between two to four persons. Its’ policy is to consult with other agencies, contractors and/or engineering firms to perform the daily functions of a municipal corporation. The management of the storm water program is achieved by employing the services of CNC Engineering and AEI-CASC Consulting under the direction of the City Engineer.

Throughout the past fiscal year, CNC Engineering (CNC) and/or AEI-CASC Consulting (AEI-CASC) staff have attended five stormwater related training workshops and/or seminars, conducted by various agencies and organizations. Attendees from CNC and AEI-CASC are considered trained in all updated permit requirements and the topics from these workshops. Their attendance is considered in part the fulfillment of permit requirements for training.

Other training includes informal discussions with persons responsible for implementing various tasks. These training can be as simple as a verbal notification of changes or providing policy updates from the Water Board or the City of Industry. These discussions have been, but are not limited to; the Phase II storm water permit, the new SUSMP city ordinance; the new BMPs available for construction activities, potential new sources of pollutants; the TMDL developments; new policies for storm water discharge enforcements; MOU for POTWs, industrial/commercial site inspections and implementation of new facilities database. All responsible persons have already been sufficiently trained regarding permit procedures, deadlines, and policies.

The following are training workshops and/or seminars attended by our staff consultant.

Staff Name	Department	Training Type	Date
Ed Suher, R.G.	AEI-CASC Consulting	QSP/QSD Training at LAUSD (Instructor) (4 Hours)	5-3-12
Ed Suher, R.G.	AEI-CASC Consulting	CESSWI Exam Review (Instructor) (8 Hours)	6-21-12
